🏴 TEST YOUR SKILLS

1 If twelve is added to twice a number the result is three less than five times the number. Find the number.

(CAN *John Abbott College*, *Final Exam*, 2002)

2 Find the measure of an angle such that three times the complement of the angle is 30° more than the angle.

(CAN *John Abbott College*, *Final Exam*, 2002)

[60°]

3 Write the sentence in bold type as an equation. (Let x represent the unknown number. DO NOT SOLVE.)
Twenty-five less a number is triple the quotient of six and twice the number.

(USA *Southeast Missouri State University: Math Field Day*, 2005)
