

YOU & MATHS **Mix up the monomials** Use the following monomials to write:

a. an addition that gives $4x^5$;

b. a multiplication that gives $24x^9$.

$4x^2$; x^5 ; $3x^2$; $6x^2$; $2x^5$; $3x^5$.

a. You can add x^5 and $3x^5$ to get $4x^5$.

b. To get $24x^9$ you can multiply $4x^2$, $6x^2$, and x^5 , or $4x^2$, $3x^2$, and $2x^5$.
